# No CAN Do™ Behavioral Training Kit

The Simple, Permanent Solution To Stopping Bad Behavior in Dogs!

## Testimonials

"I have a 5 year old Jack Russell Terrier, anyone familiar with the breed knows they developed some negative behavior, and can be extremely difficult to break of these bad habits. Our JRT had gotten into the habit of barking at the TV and at planes when outside (we live in the flight path of a small suburban airport).

I was hopeful yet skeptical when I brought the "No CAN Do" kit home and loaded the cans. But the first time our JRT started barking at a plane, I rattled the can, and she immediately stopped in her tracks. A second time was all it took to break her of the habit almost completely. All I have to do is touch the can and barely make any noise at all and she stops the behavior. Now she doesn't pay much attention to the planes while outside.

The situation was the same for her barking at the TV, I rattled the can loudly twice and that's it. The next day she started to bark again, but a touch of the can stopped her bad behavior. It was a remarkable success for what I thought was a stubborn and tenacious breed.

I would recommend the "No can do kit" for anyone who loves their dog, but would love them even more without some bad behavior". Thanks!

Craig & Liz Phelps

"As a Veterinarian, having to euthanize a dog just because the owner can't control it's bad behavior is very disturbing. And because the majority of dog owners don't take the responsibility, time and money, to train their dogs, I have seen far too many perfectly good, healthy dogs put down because the owner was convinced the dog was beyond help. This is a big topic at Veterinary medical conferences and one of the biggest concerns among Veterinarians. This simple, but effective training tool is something I can offer my clients that could save many dogs from being given up or worse!"

Dr. B Simpson, DVM

We adopted a rescue dog about 6 months ago, a mix of Labrador and Pitt Bull (we think). He was getting a bit aggressive whenever we would feed him, like he needed to protect his food. We used the No CAN Do container the next time he started to growl and it stopped him immediately! Wow. Why hasn't anyone come up with something like this before? It's so simple, yet so effective. Thanks so much!"
